Wearing of Facial Coverings:

In an effort to support best health practices the OPSWA mandates that the covering of one's face is not permitted insofar as that covering negatively impacts the wearer from making use of necessary medical devices needed to carry out delegated duties.

The association understands the rights and privileges of those that choose to wear these face coverings, however Healthcare is a unique setting that requires frontline healthcare workers to present their faces when performing care.

For any questions and concerns, please email Ian DaSilva – Director of HR at idasilva@opswa.com
